

## **Guideline on food safety culture**

### Basic principle

- The management leads by example with regard to food safety
- We assign a high priority to food safety
- We follow the basic principles of reliability, attention and responsibility

### Communication

- We communicate clearly and openly at all levels
- We look for solutions and not culprits
- We encourage each other to exchange ideas and make suggestions for improvement

### Training & awareness

- We know and understand what food safety means and why it is important
- We recognize and respond to hazards in our environment
- We actively share our knowledge and expand it together

### Review & evaluation

- We measure our food safety culture in all areas
- We regularly evaluate our food safety culture using key performance indicators

### Continuous improvement

- We set common goals to continuously improve food safety
- We shape our food safety culture together
- We all make suggestions to improve the food safety culture
